

# ESALIENS GOLD AND PRECIOUS METALS

until 30 March 2025, the Subfund operated under the name Esaliens Gold

## risk and reward profile

Risk indicator is presented in accordance with the Key Information Document. The indicator is calculated based on the historical volatility of the subfund's rates of return resulting from the implemented investment policy and may change in the future. Even the lowest risk category does not mean that the sub-fund is risk-free. Other risk factors related to investing in the sub-fund, which are not included in the indicator, are presented in the Key Information Document and the Fund Prospectus.

## investor profile

The subfund is targeted at an investor who:

- a) is looking for equity investment products with a high profit potential,
- b) seeks to achieve long-term growth of the investment and to maintain it for a period of at least 5 years,
- c) accepts high investment risk,
- d) is looking for a fund with an active, selective management style (careful selection of stocks that offer value), investing in companies involved in the production and dealing in gold and other precious metal listed on global markets.

The sub-fund may be intended, among other things, for systematic savings within long-term saving and pension programmes (CPO, IKE, IKZE, PPE).

The sub-fund performance should not be assessed in periods shorter than 5 years.

## investment process

The sub-fund invests between 70% and 100% of its assets in titles of **Franklin Gold and Precious Metals Fund** (the "foreign sub-fund") segregated within Franklin Templeton Global Funds plc.

**The investment goal of the underlying sub-fund** is capital appreciation and current income. The Franklin Gold and Precious Metals Fund invests its assets mainly in the securities of companies around the world that mine, process or deal in gold and other precious metals such as platinum, palladium and silver. The scope includes mining financing companies, mining and operating companies as well as operational companies possessing long, medium and short-term mine resources.

The sub-fund ESALIENS Gold and Precious Metals tracks as closely as possible the performance of the **Franklin Gold and Precious Metals Fund**.

The net asset value of the sub-fund may exhibit high volatility.

The sub-fund is actively managed.

The participation titles of the underlying subfund acquired by the Subfund should be hedged against currency risk.

### glossary

**Standard Deviation** – standard deviation of fund returns measures how much a fund's total returns have fluctuated in the past. Standard deviation is widely used as a basic risk measure. It shows how much a fund's annual return is likely to vary from its average annual return over a longer period. It is particularly useful when comparing two funds, in order to see which is likely to be the more volatile. The higher the standard deviation score, the more volatile the fund.
